# **BENNETT FEDERAL BUILDING**

**SALT LAKE CITY, UTAH, USA**

**The Wallace F. Bennett Federal Building in downtown Salt Lake City is a nine story high-rise with many prominent tenants including Senators Bob Bennett and Orin Hatch.**

Utah-Yamas Controls recently completed a turn-key fire alarm upgrade for the Wallace F. Bennett Federal Building in Salt Lake City, Utah. The GSA Rocky Mountain Region has completed a series of re-designed projects to enhance the buildings appearance and to bring the facilities up to code with a new fire alarm system and seismic bracing.

The GSA's goal was to obtain a positive first impression by creating a safe and professional atmosphere where the public could conduct business with federal agencies in.

The fire alarm replacement project included the upgrade of the building's existing Honeywell Delta 1000 system to a Gamewell IFS 600 Series to comply with current codes and NICET standards. The existing fire alarm system remained in service as the new system was installed. Once the new system was installed, the old system was completely removed including all panels, devices, wire and conduit systems.

The Gamewell IFS 600 Series was chosen as the system of choice because it offered an embedded CPU that offers unrivaled reliability that was a must for the GSA. The system consists of more than 1220 devices and includes audio evacuation and fire fighters telephones.

For more information on this project. Please contact your Utah-Yamas Controls Sales Representative.
